

REMARKS

Applicants respectfully request consideration of the subject application as amended herein. This Amendment is submitted in response to the Office Action mailed June 3, 2004. Claims 1-35 stand rejected. In this Amendment, Claims 1, 6, 7, 13, 19, 22 and 25 have been amended. Claims 16-18 and 26-35 have been canceled without prejudice. Claims 36-37 have been added. No new matter has been added.

Claims 6-7, 18 and 30 are objected to because of the typographical errors and informalities. Claims 6-7 and 18 have been amended accordingly.

Claims 1-2 and 10-12 are rejected under 35 U.S.C. §102(e) as being anticipated by Kenyon (U.S. Patent No. 6,701,343, hereinafter “Keynon”). Claims 3-9, 13-22, 24-26, 28-30 and 33-34 are rejected under 35 U.S.C. §103(a) as being unpatentable over Kenyon, in view of Tinkler (U.S. Patent No. 6,411,999, hereinafter “Tinkler”). Claims 23, 27, 31-32 and 35 are rejected under 35 U.S.C. §103(a) as being unpatentable over Kenyon, in view of Tinkler, as applied to claims 22, 26 and 33 above, and further in view of Balasubramaniam, et al. (U.S. Patent No. 6,701,441, hereinafter “Balasubramaniam”). As discussed below, the pending claims are patentable over the above reference.

Kenyon discloses a system for automated website creation. When the website is created, the system monitors access to the website. If the website is not used over a predetermined period of time, it is removed from active status and placed in an archive (col. 6, lines 26-32). In other words, in Kenyon, if a website is inactive, the entire website information is automatically archived.

In the presently claimed invention, in contrast, the entire website information does not need to be archived. Instead, the presently claimed invention provides for selecting specific data

from the website and then archiving the selected data. This pertinent feature of the present invention claimed in independent claims 1, 13, 19, 22, 36 and 37 is missing from Kenyon.

Tinkler does not help Kenyon to render the presently claimed invention unpatentable. Tinkler discloses a system for supporting a website. The system includes a navigation object table with navigation objects representing a navigational structure of the website, and an object handler that uses the navigation object table to construct a menu allowing a user to navigate through the navigational structure.

Contrary to the presently claimed invention, Tinkler does not provide for selecting specific data from the website and then archiving the selected data. Thus, Tinkler misses the same features of the present invention that are lacking from Kenyon. The above mentioned features are also missing from Balasubramaniam.

Accordingly, the present invention as claimed in independent claims 1, 13, 19, 22, 36, and their corresponding dependent claims, is patentable over the references cited by the Examiner. Applicant respectfully requests the withdrawal of the rejections under 35 U.S.C. §§102(e) and 103(a) and submits that all pending claims are in condition for allowance, which action is earnestly solicited.

DEPOSIT ACCOUNT AUTHORIZATION

Authorization is hereby given to charge our Deposit Account No. 02-2666 for any charges that may be due. Furthermore, if an extension is required, then Applicant hereby requests such extension.

If the Examiner determines the prompt allowance of these claims could be facilitated by a telephone conference, the Examiner is invited to contact Marina Portnova at (408) 720-8300.

Respectfully submitted,

BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN LLP
